EDUCATION

Panipat Institute of Engineering and Technology

B.Tech in Computer Science

Aug 2020 – June 2024

Samalkha, Panipat

CGPA: 7.81

GGG Public School Panipat

Sr.Sec school (Physics, Chemistry, Maths)

April 2019 – June 2020

Panipat, Haryana

Percentage: 75%

St. Mary Convent Sr.Sec School Panipat

High school (Science)

April 2019 – June 2020

Panipat, Haryana

Percentage: 75%

PROFILE SUMMARY

- Performance-driven **Computer Science graduate** with hands-on experience in **full-stack web development, automation, and Python-based systems**.
- Strong foundation in **programming fundamentals, data structures, networking, cloud basics, and IoT technologies**.
- Practical exposure gained through **internships and real-world academic projects**.
- Proven ability to **build scalable applications, automate workflows, and solve problems efficiently**.
- Quick learner with the ability to **adapt to new technologies and tools**.
- Seeking **entry-level roles** in **Software Engineering, AI/Automation, or Technology Apprenticeship programs**.

SKILLS

Programming & Core: Javascript, Python (Basics – scripting, file handling), OOPs Concepts, Data Structures (Arrays, Strings – basics) Operating Systems (Basics)

Web & Full Stack: HTML, CSS, JavaScript, PHP, MySQL, REACTJS, REST API basics, Responsive Web Design, Bootstrap

Mobile Development & AI Integration: Mobile app development using Flutter and Android Studio, integrating AI-driven features with Claude.AI for enhanced user experience

AI & Automation (Fresher Level): Generative AI fundamentals, Prompt Engineering (ChatGPT / Gemini), Claude.AI

Cloud & Tools: Git & GitHub, IBM Cloud fundamentals, Apache Server, VS Code, Hostinger, InfinityFree

Graphic & UI Design Tools: Canva, Figma

Other Essential Skills: MS Office Suite, Basic SEO Principles, Cross-Browser Compatibility, Agile methodology, Networking fundamentals, IoT concepts

EXPERIENCE

1. Full Stack Developer/ Mobile development

March 2026 – May 2026

Haett/Meal plan for busy people([website](#))

Develop and maintain responsive web applications using ReactJS, ensuring seamless UI/UX across devices and browsers.

Work with PostgreSQL databases to design, query, and optimize data-driven applications.

Contribute to mobile app development leveraging Claude AI, enhancing app functionality and user experience.

Collaborate with cross-functional teams to implement new features, optimize performance, and debug complex issues.

Assist in automating workflows and integrating AI-driven solutions to improve application efficiency.

2. Networking Intern

July 2023 – September 2023

National Fertilizer Limited

Panipat, Haryana

Developed and maintained responsive web applications using **HTML, CSS, and JavaScript**.

Implemented UI/UX best practices, enhancing website accessibility and cross-browser compatibility.

Worked with **backend technologies** such as **PHP** and **SQL**, contributing to dynamic, data-driven web applications.

Gained hands-on experience with **networking devices**, understanding their configurations and impact on web and server

Assisted in **automation, debugging, and system optimization** while working with **cross-functional teams**.

3. Internship at AICTE Lab PIET in IOT, Robotics, Python ,and MATLAB

July 2022

Designed and programmed IoT-enabled robotic systems using **Python** and **MATLAB**, integrating sensors and automation.

Developed and optimized control algorithms for **improved system performance** and **real-time data processing**.

Tested, debugged, and documented robotic systems, ensuring functionality, reliability, and efficiency.

Worked with **IoT protocols** and **microcontrollers**, enhancing connectivity and automation in embedded systems

Collaborated on system integration, troubleshooting hardware and software issues for **seamless operation**.

PROJECTS

1. Resume Analyzer (Front-End Project)([Click to view](#))

March 2025 - May 2025

Developed a **front-end-only Resume Analyzer** using **HTML, CSS, and JavaScript** to simulate **ATS (Applicant Tracking System) keyword matching**.

Implemented keyword extraction, text preprocessing, and resume–job description comparison to identify matched and missing skills.

Designed and implemented a match score calculation algorithm based on **ATS-style keyword overlap**.

Built a responsive, **user-friendly** interface following **modern UI/UX design principles**.

Executed the project entirely on the **front end**, with no backend, database, or server-side technologies involved.

2. Oshidhi-Medication ATM ([click to view](#))

March 2024 - May 2024

End-to-End Healthcare Automation: Designed and developed a **smart medicine vending system** integrating doctor consultations with automated prescription dispensing.

Custom-Built Vending Machine: Engineered a **CNC-machined vending system** for dispensing prescribed medicines based on QR code authentication.

Appointment & Prescription Management: Developed a **web platform** enabling patients to **book appointments, describe symptoms, and receive prescriptions from doctors**.

QR-Based Medicine Dispensing: Implemented a **secure QR code system** allowing patients to print prescriptions and scan codes for automated medicine retrieval.

Full-Stack Development: Built the software using **HTML, CSS, JavaScript, PHP, and MySQL**, ensuring seamless doctor-patient interactions and prescription handling.

Security & System Reliability: Integrated authentication mechanisms and real-time data processing for accurate and secure medicine dispensing.

3. E-commerce Website ([Click to view](#))

Oct 2023 – Jan 2023

Designed and built a full-stack e-commerce platform for artists to showcase and sell their artworks, ensuring seamless user experience.

Responsive Web Interfaces: Developed and optimized **UI/UX** using **HTML, CSS, and JavaScript**, enhancing accessibility and engagement.

Full-Stack Integration: Engineered backend functionalities with **PHP** and **MySQL**, including **user authentication**, artwork management, and secure payment processing.

Performance & Reliability: Led **quality assurance**, testing, deployment, and continuous maintenance to ensure platform **stability** and **security**.

4. AVS Inventory (https://github.com/Vinayaka21/AVS_Inventory)

June 2023 – Aug 2023

End-to-End Asset Management: Developed a **robust inventory management system** for tracking and managing software and hardware assets efficiently.

Full-Stack Development: Designed the frontend using **HTML, CSS, JavaScript, and Bootstrap** for an intuitive and responsive UI, and implemented the backend using **Java** and **MySQL**.

Real-Time Inventory Tracking: Automated asset tracking and stock updates, minimizing manual errors and improving operational efficiency.

User Role Management: Integrated authentication and role-based access for administrators, employees, and IT staff to ensure secure asset handling.

Optimized Database Performance: Designed efficient **MySQL** queries and indexing strategies for fast data retrieval and reporting.

System Reliability & Maintenance: Implemented logging, error handling, and scheduled database backups for enhanced security and stability.

CERTIFICATIONS

- Digital Marketing Fundamentals Certification from IIDE.
- NPTEL Certified in Cloud Computing
- NPTEL Certified in Reinforcement Learning
- NPTEL Certified in Data science for engineers
- Udemmy Certified in IOT
- IBM Certified in Introduction to Python
- Oracle Academy Certified in DBMS programming in SQL and JAVA
- IBM Certified in IBM Cloud
- IBM Certified in Agile Training
- NPTEL Certified in Python for Data science
- IBM Certified in Design Thinking
- NPTEL Certified in Design Thinking
- NPTEL Certified in Computer networks and Internet Protocols
- NPTEL Certified in Introduction to Internet of things
- NPTEL Certified in Ethics of engineering practice
